DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 7, 10, and 11 drawn to a to an isolated nucleic acid fragment encoding a histone deacetylase 1 protein, transformed host cell comprising said nucleic acid and method of expressing said nucleic acid.

Group II, claim(s) 6, drawn to a histone deacetylase 1 protein.

Group III, claim(s) 8 and 9 drawn to a method of obtaining a nucleic acid fragment encoding all or a portion of the amino acid sequence encoding a chromatin associated protein.

For each of inventions I-III above, restriction to one of the following is also required under 35 USC 121 and 372. Therefore, election is required of one of inventions I-III and one of inventions (A)-(C).

- (A). SEQ ID NO: 1 or a sequence encoding SEQ ID NO: 2.
- (B). SEQ ID NO: 3 or a sequence encoding SEQ ID NO: 4.
- (C). SEQ ID NO: 5 or a sequence encoding SEQ ID NO: 6.

The inventions listed as Groups I through III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the

Art Unit: 1652

same or corresponding special technical features for the following reasons: Groups I through III share a technical relationship which corresponds to a nucleic acid sequence which encodes a histone deacetylase 1 protein. Each of the amino acid sequences of SEQ ID NOs: 2, 4 and 6 are different and are therefore not a shared technical features. Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Tomihama et al. (EMBL Sequence Library Accession No. AF014824, Dec. 1997, See IDS) teach a nucleic acid fragment that encodes a histone deacetylase from *Arabidopsis thaliana*, and therefore the shared technical feature is not special.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
